

DUAL-Lydboks til FM ventilatorer

DUAL-lydboks for inddækning af FM ventilatormotor og toppen af ventilatorhuset.

DUAL-Lydboks til FM ventilatorer

DUAL-lydboksen omslutter ventilatormotoren og toppen af ventilatorhuset. Den kan tilpasses til alle FM enheder og kan ændres i stedet for en konventionel lydboks. Yderligere har DUAL-lydboksen den fordel at den reducerer støj omkring ventilatoren.

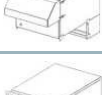

DUAL-lydboksen kan leveres i tre størrelser, der passer til FM600 ventilator serien, FM800 ventilator serien og FM1000 ventilator.

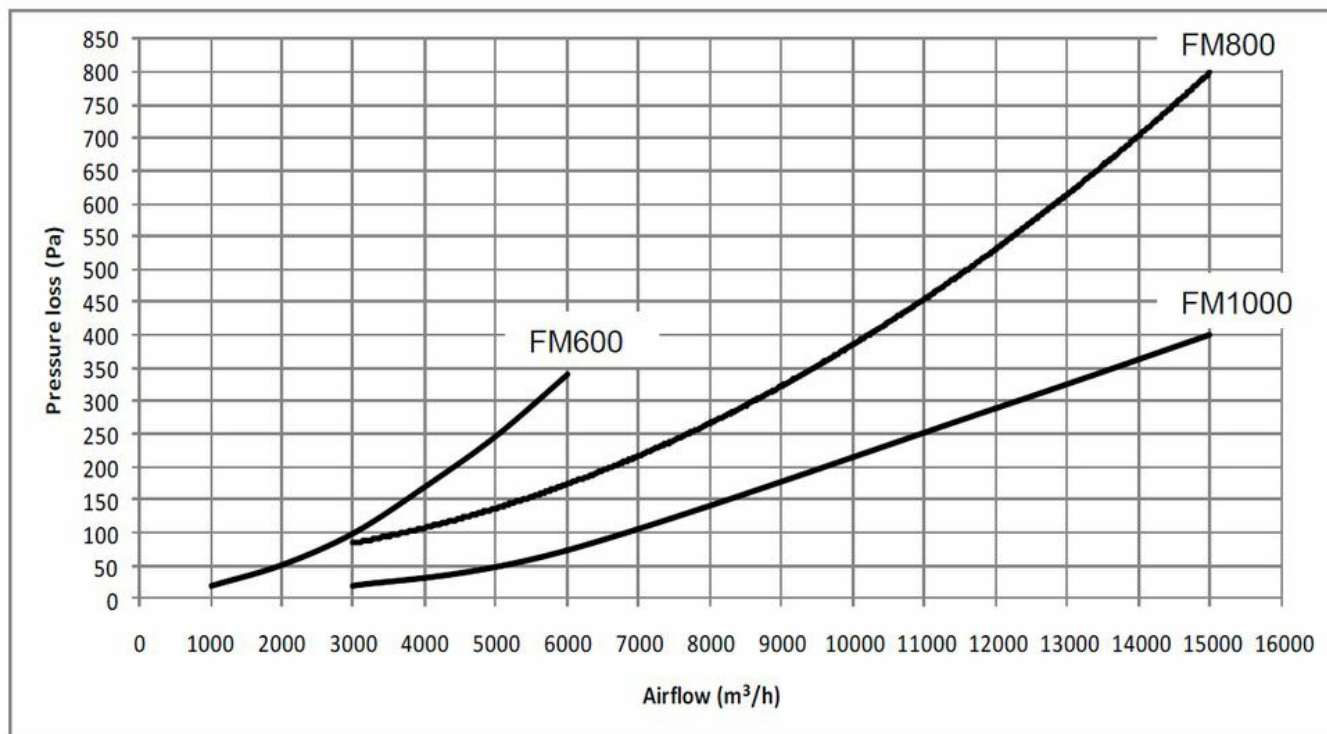

Beskrivelse

DUAL-lydboksen er lavet af 2 mm galvaniseret stål. Gitteret kan monteres med vejrskaerm eller udløb med flange. Disse enheder er udskiftelige og kan klikkes på plads på lydboksen.
