MFS Carbon plus HEPA

- Easy to install, operate and maintain filtration solution that can be mounted almost anywhere.
- Unique combination of HEPA filter and activated carbon for complete particulate and gas filtration.
- Modular design, inlet / outlet options, accessories and filter options adapt to unique requirements.
- Innovative filter design for effective filtration and reduced exposure during service.
- Recirculating clean air where allowed versus exhausting saves energy and reduces operating costs.

MFS HEPA + Carbon combines fine particulate with carbon filtration into a single convenient package and is a solution for processes generating small amounts of dust and gas or odor. The filter frame mounts directly to walls, beams or counters saving valuable work space. The inlet can be directly connected to extraction arms or hoods used to capture contaminant at the source. Integral fans or duct connect directly to the filter outlet allowing air to be recirulated or exhausted outdoors when necessary or regulations require.

The modular design allows the full range of MFS filters to be grouped together to expand capacity or filtration capability for small and large operations. Options and accessories are available for automated operation, improved service and reduce sound level.

Note: For indoor use only.
